SKILLS

- C++, Python, Assembler (basics), Git
- Fusion 360, Catia V5, CAD and CAO
- Altium, EasyEDA
- Matlab, Simulink
- AI prompting
- Desktop manufacturing
- Office suite, Latex

INTERESTS

- Mountain Sports (Mountaineering, climbing, ski touring, paragliding)
- Electronics and robotics
- 3D printing
- Entrepreneurship

LANGUAGES

French
Mother Tongue

German
Bilingual
Swiss German, mother Tongue

English
Fluent

QUALITIES

Leadership
Motivation and Commitment
Kindness

SUMMARY

Energetic, creative, and driven, I'm passionate about taking initiative and bringing ideas to life.

With strong motivation and natural leadership skills, I enjoy taking ownership of projects and collaborating with others.

Both my personal and professional experiences have strengthened my determination; I have become a responsible, growth-oriented individual who is always striving to improve.

EXPERIENCE

Engineer - Low Voltage 09/2025 - Current
Swiss Solar Boat - Lausanne

Currently working on the implementation of the low voltage electronics of the Renewable Energy Foiler of the SSB student association at EPFL

R&D Assistant - Surgical Robotics 03/2025 - 05/2025
ARTORG Center for Biomedical Engineering Research - Bern

- Developed and optimized an electrical cochlear implant insertion tool
- Conducted laboratory experiments and iterative testing to refine system performance

Production manager and Engineer – Medical device 01/2023 - 09/2024
Sterilux SA - Lausanne

- R&D of an optical ozone sensor
- Production of sterilization machines for surgical tools
- Updating work instructions for production
- Motherboard revision

Project manager – Space Satellite 09/2022 - 03/2024
EPFL Spacecraft Team - Lausanne

- Mini-satellite project sent 600m by a rocket and recovered by parachute. Environmental measurements, GPS, camera
- Assembly of the on-board computer 'Twocan' for the CHESS mission satellite

EDUCATION

Bachelor Degree : Micro-engineering, 09/2021 - 07/2024
EPFL - École Polytechnique Fédérale de Lausanne

Comprehensive training in the field of engineering, covering electronics, CAD, mechanics, programming and microengineering.

Maturity (Secondary Level) : Mathematics and Physics, 09/2018 - 07/2021
Gymnase de Marcelin - Morges

- Final year project in the field of home automation
